

Tables referenced in:

Scanlan JP. Comparing health inequalities across time and place with an understanding of the correlations between various measures of difference and overall prevalences. *Journal Review* Jan. 30, 2008, responding to Moser K, Frost C, Leon D. Comparing health inequalities across time and place—rate ratios and rate differences lead to different conclusions: analysis of cross-sectional data from 22 countries 1991–200. *Int J Epidemiol* 2007;36:1285-1291.

The tables below are referenced in the comment noted above.

In Table A, the columns reflect:

- (1) Cntry – country in Moser Table 1 (as ordered in
- (2) Yr - first or year/period indicated in Moser Table 1, of which there is some variation
- (3) HGR – under-five mortality rate per 1000 for the wealthiest quintile
- (4) LGR – under-five mortality rate per 1000 for the least wealthy quintiles
- (5) MR – mortality ratio of lowest to highest group (LGR/HGR)
- (6) SR – survival ratio of highest to lowest group ((1000-HGR)/(1000-LGR))
- (7) AD – absolute difference between rates
- (8) HMD – estimated difference between means of hypothesized underlying risk distributions (as a percentage of one standard deviation)

Information regarding change over time, shown only in row for later year/period:

- (9) HGRC: direction of change of rate of wealthiest quintile
- (10) LGRC: direction of change of rate of least wealthy quintile
- (11) MRC – direction of change of mortality ratio (MR)
- (12) SRC – direction of change of survival ratio (SR)
- (13) ADC – direction of change of absolute difference (AD)
- (14) HMDC – direction of change of estimated difference between means (HMD)
- (15) InCh – direction of change in inequality
- (16) Meth – method of identifying direction of change in inequality

In Table B, the columns reflect:

- (1)Cntry – country (ordered according to (2))
- (2)HMD1 – HMD in first year/period examined
- (3)RankYr1 – ranking by size of HMD in first year/period (smallest to largest)
- (4)HMD2 – HMD in final year/period examined
- (5)RankYr2 – ranking by size of HMD in final year/period (smallest to largest)

Table B: Ranking of Countries by Size of Inequality Based on Estimate of Difference Between Means of Hypothesized Underlying Distributions

(1)Cntry	(2)HMD1	(3)RankYr1	(4) HMD2	(5)RankYr2
Kazakhstan	0.09	1	0.31	7
Namibia	0.21	2	0.27	4
Zimbabwe	0.22	3	0.26	3
Tanzania	0.22	4	0.11	1
